

Anchor Rig Wash *Bio-Based Industrial Strength Cleaner*

Solutions Through Technology..... Environmentally Friendly Chemicals

Product Description

Anchor Rig Wash is a high performance, readily biodegradable product specifically formulated to clean drilling rigs and other oilfield equipment. The product has an alkaline pH and is environmentally “green”.

Application

Anchor Rig Wash quickly dissolves synthetic and oil based mud, cement, grease, and other debris that has been caked on to surface equipment.

Recommended Treatment

Apply a light mist of undiluted product to surface equipment with a pump sprayer. Allow product to dwell for several minutes, and then pressure wash clean.

Handling

Always wear proper personal protective equipment. Avoid skin and eye contact. If skin contact occurs, wash areas with soap and water immediately. Launder all clothing before reuse. If eye contact occurs, wash eyes for at least 15 minutes with large amounts of water. Use in well ventilated areas.

See SDS for further details regarding the safe use of this product.

Storage

Store product in a clean and dry condition. Protect product from freezing. Avoid temperatures below 25°F and above 85°F.

Packaging

Anchor Rig Wash is supplied in 55 gallon drums and tote bins. Other packaging arrangements can be arranged by request.

Typical Chemical and Physical Properties

Appearance	Blue
Odor	Mild terpene aroma
Specific Gravity @ 25°C.....	1.01 +/- 0.03
Water solubility.....	Dispersible
Physical State	Liquid
pH (10% solution).....	12.5 +/- 1.0
Boiling Point	210°F
Density (Water =1)	8.45 lbs/gallon +/- 0.3
Evaporation Rate.....	As water
